Mounting Instructions

MOUNTING INSTRUCTIONS

Warning!

We strongly recommend to let an Öhlins dealer install this product.

Warning!

If you work with a lifted vehicle, make sure that it is safely supported to prevent it from tipping over.

Note!

When you work with this product, see the vehicle service manual for vehicle specific procedures and important data.

Note!

Before you install this product clean the vehicle.

1

Put the motorcycle on a work stand so that the rear wheel barely touches the ground.

2

Remove the seat and the tank side panel.

3

Remove the screws, one in the front and one on each side, on the tank.

4

Pivot the tank up and loosen the upper attachment nut of the original shock absorber.

5

Remove the screw holding the pull rods to the swing arm. Remove the lower shock absorber attachment.

6

Remove the upper attachment of the original shock absorber. Remove the original shock absorber.

7

Remove the original spacer located between the upper shock attachment and the frame.

8

Install the Öhlins shock absorber in the same position as the original shock absorber. Use the original screws.

Note!

Lower the vehicle so that the suspension is slightly compressed before you tighten the screws.

9

Install the tank, side cover and seat. Install all removed parts in the same way as they were before the installation of the Öhlins shock absorber.

Caution!

Make sure that you tighten all screws to the correct torque and that nothing fouls or restricts movement of the shock absorber/front fork/steering damper when the suspension is fully compressed or extended.
